

SPECIFICATIONS

TEMCo ID:	TH0007
Crimping Range:	8 to 0000 AWG (4/0)
Material:	Black oxide crimp ram
For Use With:	All battery and welding cable, crimp terminal lugs (including heavy cast lugs)
Dimensions:	4" x 2.75" x 2"
Warranty:	5 Years

Place terminal in jaw of crimper.
Place stripped wire in terminal.

With crimper on solid surface,
strike crimp ram with hammer
1-2 times.

When hammer impact feels solid,
the crimp is complete.

NOTE: Some crimpers come with a gauge, but with variations in wire, terminal wall thickness and material used, this feature is a recipe for bad crimps. Using the force method above will guarantee perfect crimps every time. Once the terminal completely envelops the wire, the crimper will not move and when struck will feel "solid".
